### Sketch for <sup>2)</sup>

<sup>1)</sup> On windy locations (upwind, sloping sites and so on) additional pedestal weight may be required (Do not use granite base; Pedestal DMZ411 requires 2 sets of concrete slabs).

<sup>2)</sup> The canopy is vaulted, so that the corner spokes are 9 - 18 cm lower than the centre spokes (cf. sketch).

<sup>3)</sup> Note: The 3 metre-side is the broadside of the parasol (cf. sketch).

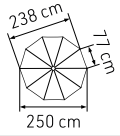

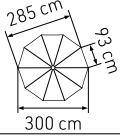

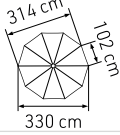

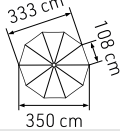

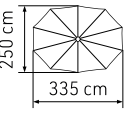

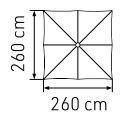

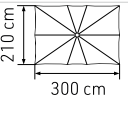

## Delivery contents

- Stringed parasol, ready to use
- Protective sleeve, also useful for protection during inclement weather.
- Stainless steel crank (except DACAPO DG)
- Without installation options
- With instructions
- With lashing strap
- Supplied in a sturdy rectangular cardboard box

Cantilever parasols are particularly wind-sensitive. For safety reasons close parasol immediately when strong winds arise. In case of doubt, do not opt for too large a size parasol for windy locations.
